Re Item V

Reasoned statement with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

Reference is made to the following document:

D1: SHAO LEI et al.: "Rate-one Space Frequency Block Codes with Maximum Diversity Gain for MIMO-OFDM", IEEE GLOBAL TELECOMMUNICATIONS CONFERENCE, GLOBECOM 2003, vol. 2, 1 December 2003, pages 809-813, XP010678177

The present application does not meet the criteria of Article 33(1) PCT, because the subject-matter of claim **1** is not new in the sense of Article 33(2) PCT.

The document **D1** discloses (the references in parentheses applying to this document) a method comprising the steps of:

- receiving content for transmission (s, fig. 1) for a plurality of transmit antennas (1, ..., M); and
- generating a rate-one (see section II-A) space-frequency code matrix (C, fig. 2) from the received content for transmission.

The same reasoning applies, mutatis mutandis, to the subject-matter of the corresponding independent claims **9** and **16**, which therefore are also considered not new.

Dependent claims **2-8, 10-15, 17-22** do not contain any features which, in combination with the features of any claim to which they refer, meet the requirements of the PCT in respect of novelty, see document **D1** (see sections II and III).
